PROJECT EXPERIENCE

Linmart Executive Hostel — Online Booking Platform

https://linmartexecutivehostel.com

- Remotely designed and deployed a hostel booking website for customer reservations
- Implemented clear navigation and booking flow to reduce user confusion
- Maintained and updated the website remotely based on business needs

---

The Closet GH — E-commerce Website

https://theclosetgh.com

- Developed and managed an online fashion store accessible to customers remotely
- Structured product pages and ordering flow for ease of use
- Provided ongoing remote updates and performance improvements

---

Flavour Hub Shawarma — Online Food Ordering Platform

https://flavourhubs.com

- Built a remote-first food ordering system for customer convenience
- Optimized the site for mobile users and fast interaction
- Supported business operations by improving online visibility and ordering speed

---

EDUCATION

University of Professional Studies, Accra (UPSA)
Bachelor's Degree — Information Technology (IT) *(Student)*

- Studying Information Technology with emphasis on systems, computing, and digital solutions
- Applying academic knowledge to real-world remote web development projects
- Balancing academic responsibilities with remote technical work

---

REMOTE WORK STRENGTHS

- Strong self-discipline and accountability
- Clear written communication
- Ability to work independently with minimal supervision
- Reliable task completion and deadline management
- Problem-solving mindset for remote environments

CAREER OBJECTIVE (REMOTE)

To secure a remote IT or web-related role where I can provide technical support, build and maintain web systems, and contribute to business success while working effectively in a distributed team.
